SINCE 1951*

# **NATIVE SEEDING GUIDE**

# OUR STORY

With seven decades of experience, a team armed with real-world strategies and a plethora of knowledge, our own production fields and a state-of-the-art seed cleaning facility, Bamert Seed is ready to meet your every need.

Bamert Seed Company was established in 1951. With practice, care, and determination, we are now a leading conservation partner. As an industry leader, Bamert Seed Company provides seed and consultations to landowners and land managers for reclamation,

restoration, conservation, and wildlife habitat enhancements. Our arid climate and supplemental irrigation provide excellent growing conditions to produce the highest quality native seed on the market.

Bamert Seed Company's dedication to providing the best has allowed us to offer over 400 species of high-quality native grasses, forbs, and legumes. The species and varieties we produce have been carefully selected to match the soil and climatic conditions of the Southern Great Plains and beyond, making them adaptable to most areas in the Southern US. Our seed has a wide variety of uses including reclamation, prairie restoration, pollinator habitat, DOT projects, conservation programs, wildlife habitat, and wildlife food plots. Our people and processes allow us to have great confidence in our product.

## Value Added Services

Consult with our specialists for custom blend development and proper planting techniques.

**If your desired species is not listed,  
please call for availability!**

Adapted varieties and local ecotype specific releases available for your area.

- Most orders shipped in 24 hours.
- FREE custom blending.
