

BAMERT
SEED COMPANY

**NATIVE SEEDS
SINCE 1951**

**NATIVE SEEDING
GUIDE**

OUR STORY

With seven decades of experience, a team armed with real-world strategies and a plethora of knowledge, our own production fields and a state-of-the-art seed cleaning facility, Bamert Seed is ready to meet your every need.

Bamert Seed Company was established in 1951. With practice, care, and determination, we are now a leading conservation partner. As an industry leader, Bamert Seed Company provides seed and consultations to landowners and land managers for reclamation,

restoration, conservation, and wildlife habitat enhancements. Our arid climate and supplemental irrigation provide excellent growing conditions to produce the highest quality native seed on the market.

Bamert Seed Company's dedication to providing the best has allowed us to offer over 400 species of high-quality native grasses, forbs, and legumes. The species and varieties we produce have been carefully selected to match the soil and climatic conditions of the Southern Great Plains and beyond, making them adaptable to most areas in the Southern US. Our seed has a wide variety of uses including reclamation, prairie restoration, pollinator habitat, DOT projects, conservation programs, wildlife habitat, and wildlife food plots. Our people and processes allow us to have great confidence in our product.

Value Added Services

Consult with our specialists for custom blend development and proper planting techniques.

***If your desired species is not listed,
please call for availability!***

Adapted varieties and local ecotype specific releases available for your area.

- Most orders shipped in 24 hours.
- FREE custom blending.

--------------------	------	------------------	------

Local Collections

Gulf Coast Prairie Collection

This collection offers unique opportunities for land owners and managers in the Gulf Coast Prairie Region. It features several species specially adapted to the region. As expected, Little Bluestem is the main component of this collection.

Smiley Prairie Collection

The Smiley Prairie Collection was harvested from remnant Blackland Prairie in Northeast Texas. Silveus dropseed (*Sporobolus silveanus*) and Longspike Tridens (*Tridens strictus*) both have stands in the remnant prairie. These unique seeds are not currently commercially available—except in the Smiley Prairie Collection.

Wildlife Blends

Wildlife Habitat Blend
Planting rate 8lb. / acre

Sideoats	1.5	Engelmann Daisy.....	0.5
Big Bluestem.....	1	Illinois Bundlesflower .	0.5
